**What If Your Handphone  
Is Lost/Stolen?**

**What Is Your Biggest  
Worry?**

# Cell-Sniper

## 1. TRACE - Tracing which SIM is active on lost handset

Alert messages are sent to 10 mobile numbers of friends as soon as the original SIM is replaced on the *lost or stolen* handset. Alerts will include GPS location (lat/long)

## 2. LOCK - Remotely Locks phone via SMS

A 'lock' SMS can be sent from any phone in order to remotely lock your mobile.

## 3. WIPE - Deletion of Confidential Data

Done remotely from any other mobile just by sending a SMS in a predefined format. You can either delete all data in your mobile or you may choose what folders you want to delete.

(Note: Deletes from Phone Memory/Memory Card)

### Deletes (Symbian):

Native Contacts

SMS

MMS

Videos

Pictures & Images

### Deletes (BlackBerry):

Native Contacts

Memos

Tasks

Events

Call-Logs

Emails & Pin Messages

# Cell Sniper

## 4. Remote CallBack

Remote CallBack feature enable user to listen to the conversation of the thief .

## 5. Track

Track current location of the lost/stolen Hand phone via SMS

## 6. Mobile Data Backup And Restoration

Sync option allow EASY access to OTA Data Backup and Restoration.

**(Note: BlackBerry does not have this feature)**

## 7. Password Protected Un-Installation

To Uninstall, user must enter application LOG IN password. If the password is incorrect the phone will automatically lock and alerts will be sent to owners friends.

## 8. Alarm

Enable or disable alarm on lost/stolen/misplaced Blackberry via SMS.

**(Note: Symbian does not have this feature)**

# Cell-Sniper

## 9. CUSTOM MESSAGE

Remotely trigger display of custom message on lost/stolen Blackberry.

**(Note: Symbian does not have this feature)**

## 10. AUTHORIZED SIMs

Feature allow Blackberry subscribers to authorize additional SIM cards without triggering alerts.

**(Note: Symbian does not have this feature)**

# Why HYDE(Symbian)?

Parental Control  
Business

- **General**

HYDE is an application that will help you to manage all incoming calls and messages on your Symbian Series 60 phones.

- **Contact**

Hyde will maintain a list of its own contacts known as *'Hyde Contacts'*

- **Hiding SMS/MMS**

1. Message Interception based on *'Hyde Contacts'*.
2. Hidden SMS/MMS can be access and act upon from within a HYDE application.
3. SMS/MMS can be auto deleted upon receiving and there will be logs on deleted messages.

- **Voice Call Interception**

1. Intercept and drop voice calls based on *'Hyde contacts'*
2. Complete log for rejected calls

- **Filter**

1. HYDE application can filter incoming calls and messages according to the filter preference that is configured.
2. Supports three types of filters; *'Whitelist'*, *'Blacklist'* and *'Profile'*.
3. *Whitelist*: Blocks all calls except those on the Whitelist.
4. *Blacklist*: Blocks all calls on the Blacklist
5. *Profile*: Appropriate actions will be taken according to the profile that is assigned to a particular HYDE Contact. Actions ranging from rejecting calls, Auto-Deleting messages and HYDE notification message on hidden SMS/MMS and rejected calls.

- **Password protected uninstall Hyde**

Uninstall HYDE, the user has to enter the correct application login password; if the password is incorrect then the Hyde application cannot be uninstalled from the phone.

## Installing and Activation For Symbian

- Bluetooth the \*.SIS file to the target Hand Phone.
- To install and activate, click on the received SIS installer file in the Inbox.
- Auto installation will be initiated. Follow the phone's instructions to complete installation.
- After successful installation, icon will show up in your phone's main "Applications Menu".
- Click on the Application Icon
- Relevant user information would be shown, please go through it once and click "OK"
- Enter the Activation key and click ok.
- Application is successfully Installed and Activated.

## Installing and Activation For BlackBerry

- Unzip the Downloaded “CellSniperBB.Zip” to one folder, which would contain “CellSniperBB.alx” and “CellSniperBB.cod”.
- **Installation:** Launch Application Loader from BlackBerry Desktop Manager on your PC.
- Click on Add button.
- Locate the “CellSniperBB.alx” file and then click open.
- Click Next and then Click Finish. **Congratulation! CellSniper is successfully installed.**

## Alternate method for Installing and Activation For BlackBerry

- Unzip the Downloaded “CellSniperBB.Zip” to one folder, which would contain “CellSniperBB.alx” and “CellSniperBB.cod”.
- **Installation:** Unzip the “cellSniper\_BB\_Express\_Installer.zip” file.  
(Dependency: BlackBerry Desktop Manager)
- Attach the BlackBerry phone to the computer using USB cable.
- Copy the “CellSniperBB.cod and” “CellSniperBB.alx” to the Unzip folder of CellSniper\_BB\_Express\_Installer.
- Open the CellSniperExpressInstaller.exe.
- Click on the Install button (refer the figure in the next slide).
- Phone would restart and CellSniper would be installed into the phone .  
**Congratulation! CellSniper is successfully installed.**

Click on Install button to install into the phone.

### CellSniperExpressInstaller.exe

#### Security Settings

- Go to Options > Security Options > Application > Permissions > CellSniper  
Select Menu option Edit Permissions, set the following:  
Connections: Allow  
Interactions: Allow  
User Data: Allow

**(Note: HYDE is not supported for BlackBerry)**
